About Us

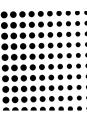

Alobha Technologies specializes in secure digital transformation and enterprise-grade software solutions and services. We empower businesses to manage field mobility, enforce policy compliance, and reduce risk with robust Android-based control tools.

- **Support Email:** info@alobhatechnologies.com
- Website: https://alobhatechnologies.com
- Address: Suite No. 309, Third Floor, Infinity Tower, H-221, H Block, Sector 63, Noida, Uttar Pradesh 201301
- **Deployment Model:** Internal Use Only (Enterprise Distribution)

Mobility Challenges

- Supporting distributed workforces without compromising security
- Streamlining secure onboarding of new Android devices
- Preventing unauthorized use of companyowned devices
- Enforcing uniform security policies across enterprise devices

Solution Overview

Alobha EMM is a purpose-built, internal-use Enterprise Mobility Management platform that empowers organizations to provision, monitor, and control Android devices issued to employees.

Key capabilities include:

- Seamless QR code provisioning
- Full device control using Device Owner mode
- Tight integration with ERP/CRM systems
- Real-time enforcement of device and app policies

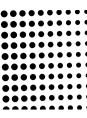

Key Features

- QR Code (Zero-Touch Provisioning upon enrollment)
- Device Owner Mode
- Kiosk Mode for business app lockdown
- Remote Lock / Unlock
- IMEI-based Device Verification
- Network & App Policy Enforcement
- OS Update Management

.

.

- Company Branding on Lock Screen
- Preconfigured Factory Reset Protection(FRP)

Branded Lock Screen Example

When policies are enforced, devices display a **custom-branded lock screen** with:

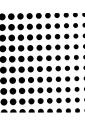

- Company logo
- Device ownership statement
- Return instructions
- Managed identity verification

This Device Belongs to The Alobha Technologies Pvt Ltd. If you found this device, please return it to the respective owner.

Address: Suite No. 309, Third Floor, Infinity Tower, H-221, H Block, Sector 63, Noida, Uttar Pradesh 201301 Phone: 096679 09628

Use Case Scenarios

- Field Force Enablement: Restrict usage to work-related apps
- Shared Operations: Control devices in warehousing, logistics, or shared internal use
- **Kiosk Deployments:** Company-owned devices locked to specific business apps for internal-facing or shared use
